Micro Gaming Technologies, Inc. (MGT) designs and develops software to automate, track and report all of your casino promotions. The MGT software applications interface bi-directionally with your existing player tracking system and a touch-screen device. MGT's newest API development allows you to directly connect your promotions with your patrons via website and mobile.

All of these devices become an employee that knows every player in your database, can evaluate the historical/current gaming activity in real time and use the information to determine an appropriate prize for each patron. Prizes can instantly post to the patrons account and includes slot free play, points, comps, and drawing entries.
